

Data Retention & Deletion Policy

Organization: Rough Cut Manufacturing ("the Company"), operator of the WorkTrackPro application

Policy Owner: Jacob Rough, Chief Executive Officer — jacobrrough@gmail.com

Version: 1.0 **Effective Date:** June 17, 2026 **Next Review:** June 17, 2027

1. Purpose

This policy defines how long Rough Cut Manufacturing retains the data it processes, and how that data is securely deleted, so that information is kept only as long as necessary for business and legal obligations and in compliance with applicable data-privacy laws.

2. Scope

Applies to all data processed by the WorkTrackPro application and its supporting systems (Supabase, Netlify, Plaid, QuickBooks Online), across all environments.

3. Principles

- **Retain only what we need, for only as long as we need it.** Data is retained for the period required to deliver the Service and to meet legal, tax, and accounting obligations, then deleted or anonymized.
- **Strongest controls for the most sensitive data.** Financial-account credentials receive the shortest practical retention and are removed as soon as a connection is no longer needed.

4. Retention schedule

Data category	Retention period	Notes
Accounting & financial records (invoices, estimates, bills, journal entries, bank transactions)	7 years	Aligns with U.S. tax/financial recordkeeping practice; then deleted or archived.
Bank-feed connection credentials (Plaid/QuickBooks access tokens)	Life of the connection	Deleted/revoked immediately upon disconnection or account closure.
Customer & vendor records, job/manufacturing data	Duration of the business relationship + 7 years	Supports warranty, accounting, and legal needs.
User account data (name, email, role)	While the account is active	Deleted or anonymized within 90 days of account closure, subject to legal holds.
Authentication & security logs	12 months	Retained for security monitoring and incident investigation.
Backups (point-in-time recovery)	Per hosting provider's backup window	Deleted data ages out of backups on the provider's schedule.

Where a legal hold, dispute, or regulatory obligation requires longer retention, the affected data is retained until the obligation ends.

5. Deletion procedures

- **On disconnection of a financial account:** the stored access token is removed/revoked and the account is unlinked, stopping further syncing. Previously imported transactions are retained as part of the accounting record (per §4) unless deletion is requested and permissible.
- **On account closure:** user account data is deleted or anonymized within 90 days, subject to legal holds.
- **On a verified deletion request:** we delete the requester's personal information that we are not legally required to retain, and confirm completion (see §6).
- **Method:** deletion is performed in the production database (Supabase); the data then ages out of encrypted backups on the provider's schedule.

6. Honoring data-subject requests

Individuals may request access to, correction of, or deletion of their personal information by contacting jacobrrough@gmail.com. We verify the requester's identity and respond within the timeframe required by applicable law (e.g., CCPA/CPRA for California residents). Requests that conflict with a legal retention obligation are fulfilled to the extent permitted, and the reason for any retained data is communicated to the requester.

7. Responsibilities & enforcement

The Policy Owner (Jacob Rough, CEO) is responsible for enforcing this policy, fulfilling deletion requests, and ensuring retention periods are applied. Failure to follow this policy may result in revoked access and corrective action.

8. Review

This policy is reviewed at least annually, and after any material change to our systems, data types, or applicable law, and updated as needed by the Policy Owner.

Document control: maintained by the Policy Owner (Jacob Rough, CEO). Supersedes all prior versions.
